

Help keep our waters clean by picking up after your pet!

Pet waste contains bacteria, parasites, and viruses that, when carried with runoff into the storm drain system, can pollute nearby waterbodies and threaten the health of wildlife, our pets, and us!

Washington State Department of Ecology.

Here's what you can do to help keep our waters safe:

1. Always clean up after your pet, even in your own yard.
2. Carry disposable bags with you when walking your pet.
3. Always throw your bagged pet waste in the trash.
4. Remind your family and friends about the importance of picking up after their pet.

Be responsible for your pet. Make a difference in our community by remembering to scoop the poop!
