

# Drainage Pipe Maintenance

## TIPS

- Keep yard debris and trash away from or out of your inlet
- Keep the curb by your home clean and clear
- Report drains that flood or drain slowly
- Do not plant on top of or cover your storm-water manhole
- Do not build a fence on top of your inlet
- Do not put yard debris into pipe or ditch systems
- Keep pet waste out of the system!

The Town of Mount Pleasant uses a special pipe cleaning truck called a “hydro-excavator” to remove debris from the piped drainage system. Currently we work off of service requests that our residents submit but are working on a cleaning scheduling program for the future.

*Please note that the Town accesses the public system through drainage easements that may be on your property. The Town is authorized to access these easements and systems at any time. The Town is not responsible for the replacement of your landscaping or fences etc. in the course of our repair activities. We make EVERY effort to minimize the intrusive nature of our repair work.*
